For over 100 years, Megger has been the premier provider of electric test equipment and measuring instruments for electrical power applications. This famous brand name dates back to 1889, when the first portable insulation tester was introduced with the MEGGER brand name on it. We introduced the first commercial cable fault locator in 1950; and were the first to develop a completely automatic, software driven protective relay test system in 1984.

Megger has testing solutions in the most critical maintenance areas such as insulation, transformer, circuit breaker, protective relay, power quality and cable testing and diagnostics. With such diverse product offerings, we are your single source for electrical test and measuring instruments.
